

RUSHIKESH ANKUSH POTE

Mobile Application Developer | Flutter & Dart

+91 7020659533 | rushikeshpote2005@gmail.com | [Linkedin](#) | Pune, Maharashtra, India

PROFESSIONAL SUMMARY

Mobile Application Developer with **2+ years of experience** designing, developing, and deploying scalable cross-platform applications using **Flutter and Dart**. Proven expertise in building enterprise-grade **CRM systems, e-commerce platforms, government service applications**, and school management solutions. Proficient in **MVC Architecture, REST API Integration, Firebase Services, GetX & BLoC State Management, Payment Gateway Integration**, and Geolocation Services. Strong track record of end-to-end product delivery across **Android, iOS, and Web** platforms.

TECHNICAL SKILLS

Languages: Dart, Java, JavaScript, HTML, CSS

Mobile Development: Flutter (Android, iOS, Web), Responsive UI Development

Architecture: MVC Architecture, Clean Architecture, Repository Pattern, Modular Development

State Management: GetX, BLoC, Provider, SetState

Backend & APIs: REST APIs, Dio, JSON Parsing, Spring Boot (basic)

Firebase: Authentication, Firestore, Realtime Database, Cloud Messaging (FCM), Push Notifications

Databases: MySQL, MongoDB, Firebase Realtime Database

Tools: Git, GitHub, Bitbucket, Postman, VS Code, Android Studio

Other Skills: Payment Gateway Integration, Bluetooth Printing, QR Code Scanning, Google Maps SDK, GPS Tracking, Multi-Language Support, CI/CD Fundamentals, Performance Optimization

PROFESSIONAL EXPERIENCE

Mobile Application Developer | **BAAP Company, Sangamner** | Nov 2023 – Present

- Developed and maintained **scalable Flutter applications** for Android, iOS, and Web platforms serving enterprise clients.
- Designed **reusable UI components** and implemented **MVC Architecture**, reducing codebase complexity and improving maintainability.
- Integrated **REST APIs, Firebase Services, Payment Gateway Integration**, Push Notifications (FCM), and Google Maps SDK.
- Implemented **GetX and BLoC State Management** for enterprise-scale CRM and e-commerce applications.
- Optimized **application performance and API response handling**, resulting in improved user experience and reduced load times.
- **Led a team of developers** for the Janhit Application, managing project architecture, module assignments, and production deployment.
- Participated in full **software delivery lifecycle**: requirement analysis, development, testing, debugging, and deployment.

PROJECT EXPERIENCE

Baap CRM – Enterprise CRM Application

Enterprise-grade CRM solution to streamline sales operations, field force management, customer engagement, and warehouse workflows.

- Developed modules for **Lead Management, Follow-ups, Call Logs**, and Campaign Tracking.
- Implemented **GPS Geolocation Tracking, real-time Trip Logs**, and offline-first data synchronization.
- Integrated **Bluetooth Thermal Printing, QR Code Inventory Scanning**, and **Payment Gateway Integration**.
- Used **Kotlin** to natively fetch and manage call logs on Android; state handling with **GetBuilder with ID**.

Tech Stack: *Flutter, Dart, GetX, GoRouter, Dio, REST APIs, Firebase FCM, Google Maps SDK, Kotlin, MVC Architecture*

Dealer App – E-Commerce & Inventory Management

Comprehensive e-commerce application enabling product catalog management, quotation generation, ordering, inventory tracking, and payment processing.

- Developed complete **Order Lifecycle Management** including cart, checkout, order history, and tracking.
- Integrated **Inventory Management, Quotation Generation**, and **secure Payment Processing**.
- Implemented scalable **Product Catalog** with filtering and search capabilities.

Tech Stack: *Flutter, Dart, GetX, Dio, REST APIs, Payment Gateway Integration, MVC Architecture*

Janhit Application – Citizen-Government Services Platform

Flutter-based citizen-government service platform enabling users to register and track public grievances digitally.

- **Led the development team**; managed project architecture, module assignments, and end-to-end delivery.
- Delivered features including **Complaint Filing, Government Schemes Browser, Public Notices, Suggestions Portal**, and AI-powered chat support.
- Implemented **Role-Based Access Control, GPS Location Capture, Real-Time Notifications**, and analytics dashboard.
- Oversaw **development, testing, and production deployment** of complete platform.

Tech Stack: *Flutter, Node.js, Firebase, REST APIs, GPS Integration, MVC Architecture*

SchoolBook – School Management Application

School management application to digitize daily academic and administrative operations.

- Developed **Real-Time Attendance Management, Timetable Scheduling**, and parent-teacher communication modules.
- Implemented secure **Firebase Authentication** and cloud synchronization for student records.
- Integrated **Push Notifications (FCM)** for real-time parent-teacher updates.

Tech Stack: *Flutter, Firebase Authentication, Firebase Realtime Database, FCM, MVC Architecture*

EDUCATION

Bachelor of Computer Applications (BCA) | University of Mysore

HSC (12th Science) | Pune University
